EXAMINER'S AMENDMENT

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

The title has been changed to --RECIPROCATING COMPRESSOR WITH A PRESSED FIT BUSHING--, to better indicate the invention.

REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance: the combination of elements as claimed is deemed to be directed to an unobvious improvement over the invention patented by Korean 10-275877. Korean 10-275877 discloses a reciprocating compressor comprising a connecting rod (8) connecting a piston (7) to a rotating eccentric shaft (5b); a bush (sl) between an eccentric shaft mounting hole in an end of the connecting rod and the eccentric shaft; a fitting projection (20) on the eccentric shaft mounting hole corresponding to and fitting into a fitting recess (30) on the bush, by a loose fit (abstract). The difference comprises that the fitting projection fits into a fitting recess, by a press fit.

Merriman teaches, for a bushing (10) fitted into a mounting hole, wherein the bushing has recesses (22), that the bushing is press fit into the mounting hole (e.g. column 1 line 12-24); but the mounting hole is a smooth bore (e.g. column 2 line 13-14).

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, preferably **accompanies** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
